

WHY Would Bayonne
Trust Surgicore and
CarePoint with
\$100 MILLION?

CarePoint Health faces eviction as the operator of Bayonne Medical Center as a result of defaults under its lease and is strong-arming Mayor Davis into a scheme where the City Bayonne would use eminent domain to buy the hospital property for \$100 million and turn it over to CarePoint's hand-picked successor BMC Hospital LLC.

SURGICORE FOUNDERS ARE BEHIND THE BMC HOSPITAL LLC BID:

- NEVER operated an acute care facility
- UNABLE to get Department of Health approval to operate Bayonne Medical Center
- SUED by GEICO for overbilling

CAREPOINT HANDPICKED BMC HOSPITAL LLC TO ACQUIRE BAYONNE MEDICAL CENTER:

- NJ State Department of Investigation found it bilked \$157 million out of the healthcare system - then declared it had lost millions at Bayonne Medical Center and needed to sell out
- Last week was found to be charging for covid immunizations
- CarePoint's majority owner is under a 14-count Department of Justice Investigation based on related Medicare Insurance Business
- A New York Times article called Bayonne Medical Center the most expensive hospital in the country

Hudson Regional Hospital, the most esteemed acute care provider in Hudson County, is the transparent, financially-stable, owner of the Bayonne Medical Center property and has offered to purchase the operations of the hospital from CarePoint WITH NO PUBLIC FUNDING REQUIRED.

Hudson Regional Hospital is the only entity in a position to marry hospital property ownership with a guaranteed acute care operating plan.

What is it about BMC Hospital LLC that would compel Mayor Davis to hand them \$100 Million?
